PROFESSIONAL PROFILE

Experienced Microsoft Dynamics 365 Business Central Developer and Solution Architect with over 13 years of specialized expertise in delivering scalable, integration-driven solutions across diverse industries and international markets. I am passionate about solving complex business challenges through innovative BC customizations, seamless system integrations, and robust module development.

Throughout my career, I have successfully led and contributed to numerous BC implementations—both as a sole developer and within cross-functional teams—consistently delivering high-quality solutions that enhance operational efficiency and drive business value. My technical focus encompasses custom API development, Dataverse integration, Power Platform connectivity, and extending standard BC functionality to meet unique business requirements.

I thrive in dynamic environments where I can apply my deep technical knowledge, collaborate with stakeholders to understand business needs, and architect solutions that are not only technically sound but also aligned with strategic business objectives. My motivation stems from the opportunity to transform business processes through technology and continuously expand my expertise in the evolving Microsoft Dynamics ecosystem.

CORE COMPETENCIES

- Full lifecycle Business Central development (on-premise & SaaS cloud)
- Custom API development and RESTful web services integration
- Dataverse Virtual Connector and Project Operations integration
- Power Platform integration (Power Apps, Power Automate, Copilot Studio)
- Custom module development (Quality Management, Billing, HR, Localization)
- Document exchange frameworks and EDI integration
- Retail & POS solutions development
- Azure Functions and serverless architecture integration
- Solution architecture and technical design
- Compliance and localization for European markets

PROFESSIONAL EXPERIENCE

Solution Architect & Business Central Developer (Independent Contractor)

sa.global, Belgrade, Serbia | March 2024 – Present

- Sole BC developer engineering integration between Business Central and Dynamics 365 Project Operations using Dataverse Virtual Connector
- Designed and implemented real-time data exchange for projects, resources, and financial data across both platforms
- Extended data flows bi-directionally, enriching Project Operations with BC-originated financial data and vice versa
- Improved project lifecycle management and financial accuracy through seamless system integration

- Collaborated with stakeholders to understand business requirements and translate them into technical solutions

Business Central Developer (Independent Contractor)

Hansen Technologies, Belgrade, Serbia | February 2024 – November 2024

- Supported large-scale implementation of custom billing solution built on Business Central for major telecom client
- Developed custom billing product features and participated in on-premise customer implementation
- Provided technical guidance during rollout phase and adapted solution for scalability and regulatory compliance
- Implemented complex pricing models and recurring billing functionality

Solution Architect & Business Central Developer (Independent Contractor)

Merit Solutions, Belgrade, Serbia | September 2023 – Present

- Architected and developed comprehensive Quality Management Module in Business Central from ground up
- Replaced planned integration with Dynamics 365 Finance & Operations by building native BC solution
- Implemented non-conformance tracking, corrective actions, inspections, and compliance workflows
- Designed data model, business logic, and user interfaces for complete quality management processes

Business Central Developer (Independent Contractor)

InterRadish, Belgrade, Serbia | November 2024 – Present

- Sole BC developer integrating Warehouse Only Mode (WOM) with Business Central
- Designed and implemented custom APIs for bi-directional data synchronization between WOM and BC
- Enabled seamless warehouse execution by integrating WOM data into BC's native warehousing processes
- Developed real-time inventory, order, and shipment synchronization workflows
- Enhanced warehouse reporting capabilities by consolidating WOM operational data within Business Central

Business Central Developer

Microsoft, Belgrade, Serbia | March 2023 – July 2023

- Worked directly with Microsoft development teams on Business Central platform enhancements
- Contributed to BC core functionality development and testing
- Gained deep insights into BC architecture, best practices, and upcoming features

Development Team Lead & Senior Business Central Developer

NaviPartner, Belgrade, Serbia | July 2020 – February 2023

- Core team member contributing to design and development of custom POS solution integrated with Business Central
- Built competitive alternative to enterprise retail platforms with focus on transaction processing and offline resilience
- Developed real-time inventory synchronization between POS terminals and Business Central
- Progressed to Development Team Lead, managing multiple developers for customer projects
- Provided technical leadership, code reviews, and mentoring to development team

Business Central Developer

Embla Solutions (part of Advania), Belgrade, Serbia | November 2017 – December 2018

- Led full-cycle integration between Business Central and Warehouse Operations Management system via custom APIs
- Designed bi-directional data synchronization for inventory, orders, and shipments
- Developed document exchange framework for automated processing of XML, CSV, EDI, and PDF documents
- Enabled seamless invoice, order, and master data interchange with external partners and government systems

Business Central Developer

Traser Software, Belgrade, Serbia | June 2017 – November 2017

- Developed BC customizations and extensions for client-specific requirements
- Participated in implementation projects across various industry sectors

Product Developer & Implementation Specialist

Adacta (part of BE-terna), Belgrade, Serbia | November 2012 – May 2017, January 2019 – July 2020

- Core product team member delivering 20+ Business Central implementations across Adriatic region
- Developed and maintained custom modules including Billing, HR, and Localization components
- Ensured compliance with regional tax, legal, and reporting requirements for Serbia, Croatia, Bosnia & Herzegovina
- Created localized financial reporting and VAT reporting solutions

TECHNICAL SKILLS

- AL Development Language (Expert level)
- C/AL Development (Legacy NAV, Expert level)
- Business Central SaaS & On-Premise architectures
- Extension development and AppSource packaging
- Dataverse Virtual Connector integration
- Business Central API development (custom and standard APIs)

Integration & Web Services

- REST API design and implementation
- SOAP web services
- OData protocol
- Azure Functions and serverless integration
- EDI (Electronic Data Interchange) integration

Microsoft Power Platform

- Power Apps integration with Business Central
- Power Automate workflows
- Copilot Studio connectivity
- Dataverse data model design

Programming & Development

- Object-oriented programming in C#
- JavaScript/TypeScript
- Python

- MS SQL Server & T-SQL
- SQL Reporting Services (SSRS)

Development Tools & Practices

- Source control: GitHub, Azure DevOps, Bitbucket
- CI/CD pipelines for BC extensions
- Visual Studio Code with AL Language extension
- Agile/Scrum methodologies

EDUCATION

Bachelor of Organisational Sciences

Faculty of Organizational Sciences, University of Belgrade, Serbia | 2008 – 2012

- Department: Information Systems and Technologies
- Focus on enterprise information systems, software development, and business process optimization

Bachelor of Science in Mechanical Engineering

College of Technical Vocational Studies, University of Kragujevac, Serbia | 2004 – 2007

- Department: Industrial Informatics
- Combination of mechanical engineering principles with industrial automation and information systems

ADDITIONAL INFORMATION

- Languages: Serbian (native), English (fluent - professional working proficiency)
- Work arrangement: Independent contractor with flexibility for both remote and on-site collaboration
- International experience: Successfully delivered projects for clients across Europe
- Available for: Full-time positions, project-based engagements, or consulting arrangements
- Continuous learning: Actively following Microsoft Dynamics 365 platform updates, AI capabilities (Copilot), and exploring AI-driven automation in Business Central
